Pre-paying

Ross Medina

2 years ago · Updated

Follow

If you need to pay for an order before it gets processed, you can make a pre-payment on the account which will then be applied when the order finishes. The payment is not applied to the order immediately as a mechanism to allow you to modify pricing through out the process if needed (i.e missed repairs, up-charges, etc).

1. Create new order and detail all items.

If you're dealing without previously barcoded items, use the No Barcode option to save your customer some time. You can add barcodes once the customer is gone even after order has been Closed.
