# Turning Mobile Hotspot On

Ross Medina

2 years ago · Updated

Follow

To use your phone as a WiFi internet provider, enable the Hotspot feature on your phone using the instructions below. Once the hotspot is enabled, look for the network on your station's WiFi settings and connect as usual. Remember to turn your phone's hotspot off when you are done using it.

## Apple iOS

- Go to *Settings*.
- Choose *Personal Hotspot*.
- Tap the button to turn your personal hotspot on.
- Agree to *Wi-Fi and USB Only*.
- Your hotspot is now active. The password is on your iPhone's screen.

## Android

Android phones have different methods of activating Hotspot mode. Here are instructions for some of the more recent popular phones.

Help

## Google Nexus 5 (Android 5.0)

- Go into *Settings* in the application drawer.
- Under *Wireless & Networks*, tap *More*.
- Tap *Tethering & Portable Hotspot*.
- Tap *Set Up Wi-Fi Hotspot* to set your password. Tap *Save*.
- Tap the slider next to *Portable Wi-Fi Hotspot* to enter Hotspot mode.

## HTC One M9

- Drag the notification pane down by dragging from the top of the screen.
- The hotspot will be in the bottom row of quick settings. Set it up with a password.
- Drag the notifications pane down again. Tap on *Wi-Fi Hotspot Active*.
- Make sure the switch next to *Portable Wi-Fi Hotspot* is On.

## LG G3

- Drag the notifications pane down.
- Drag the quick settings bar at the top to the right. It will expose *Mobile HotSpot* just after *Rotation*.
- Tap *Mobile Hotspot*. This will walk you through the setup process.
- In the future, to turn the hotspot on or off, use the *Mobile HotSpot* button in the notifications pane.

## Motorola Droid or X

- Go into *Settings* in the application drawer.
- Under *Wireless & Networks*, tap *More*.
- Tap *Tethering & Mobile Hotspot*.
- Tap *Mobile Hotspot* to turn the hotspot on.
- Tap *Mobile Hotspot Settings*, then *Configure Mobile Hotspot* to set your password.

## Samsung Galaxy S5

- Go into *Settings*.
- Tap *Connections*.
- Tap *Tethering and Wi-Fi Hotspot*.
- Tap *Mobile Hotspot*.
- Tap *Off* (switching it to On).

## Samsung Galaxy S6

- Go into *Settings*.
- Tap *Connections*.
- Tap *Mobile Hotspot and Tethering*.
- Tap *Mobile Hotspot*.
- Tap *Off* (switching it to On).

### Sony Xperia Z3

- Drag the notifications pane down.
- Tap on *Quick Settings* at the top of the screen.
- Tap on *Mobile Hotspot*.
- Step through the instructions.

### Windows Phone 8.1

- Swipe down to get the notifications bar.
- Choose *All Settings*.
- Scroll down to *Internet Sharing*.
- Make a note of the Wi-Fi network name and password.
- Tap the slider next to *Off* to turn sharing on.

### Google Pixel

- From a Home screen, swipe up to display all apps.
- Navigate: **Settings** > Network & internet > **Hotspot** & tethering .
- Tap Wi-Fi **hotspot** to **turn** on or off.
- If presented with the 'Warning' screen, tap OK

### Samsung Note 10

- From a Home screen, swipe up from the center of the display to access the apps screen.
- Navigate: **Settings**  > **Connections**  > **Mobile Hotspot and Tethering**.
- Tap **Mobile Hotspot**.
- Tap the **Mobile Hotspot switch** to turn on  or off .
- If prompted, review the info then tap **OK** to confirm.
