How to Create Locker Locations

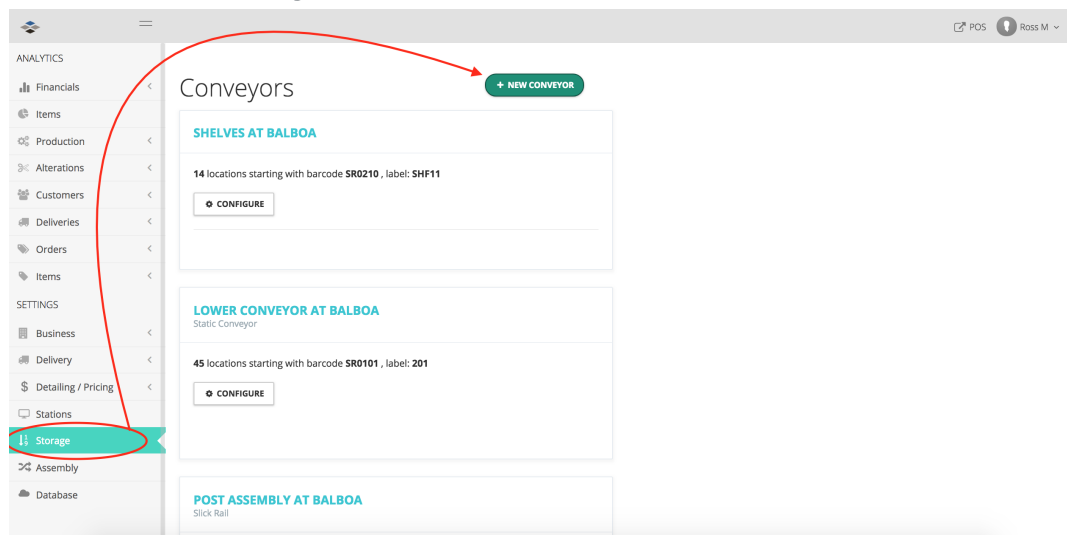

Josh Nye

2 years ago · Updated

Follow

1. Go to the Storage section of the Admin Panel and click the New Conveyor button.

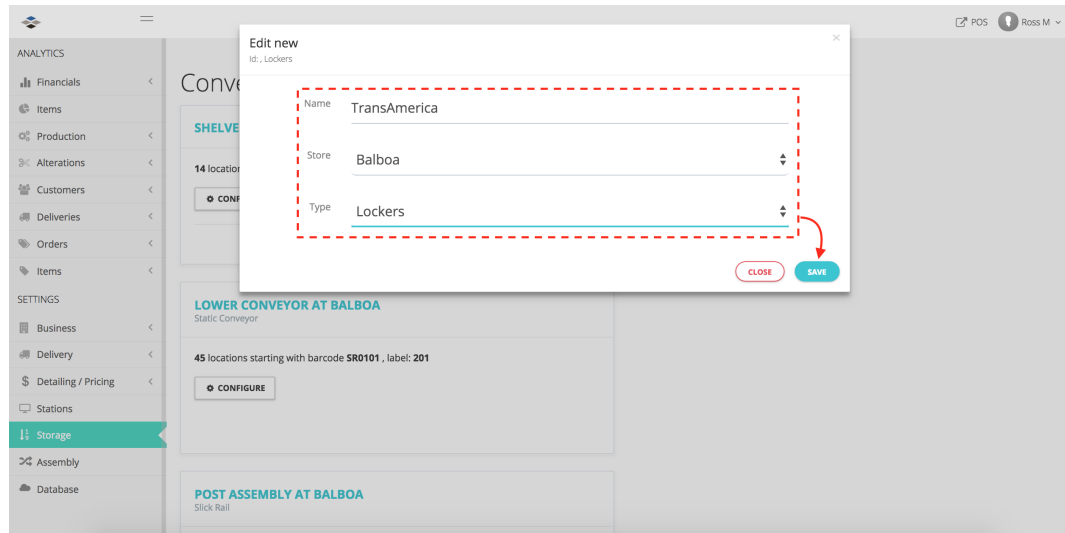

2. Name the lockers based on the building they will be in.

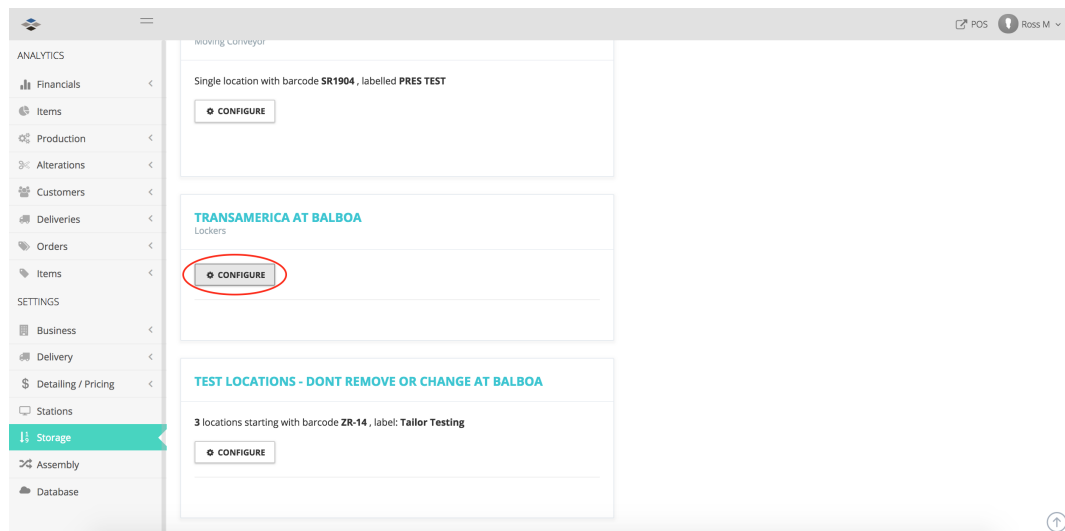

Help

3. Select the store that the routes that deliver to these lockers run from.

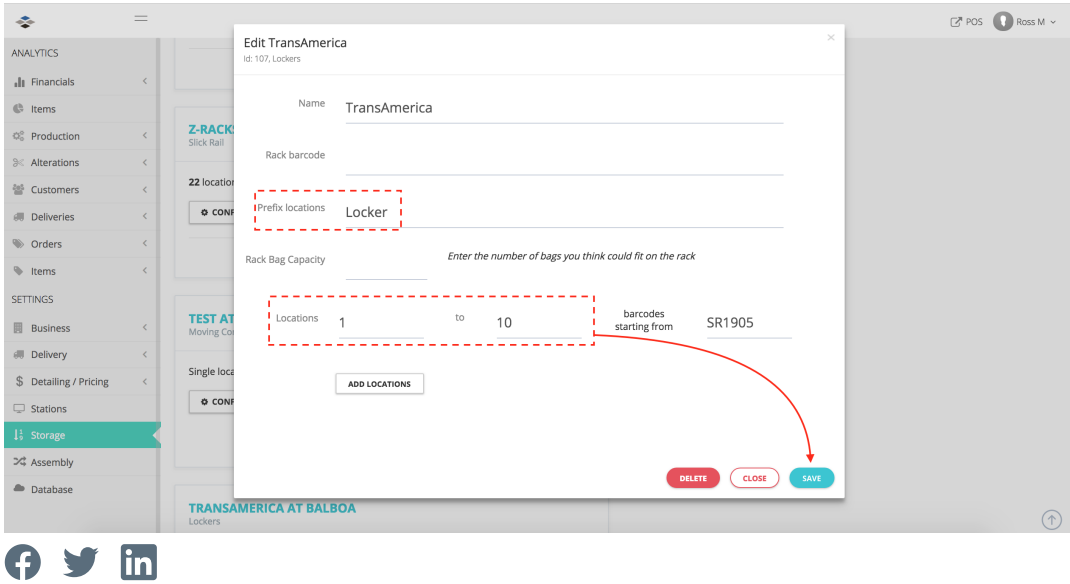

4. Select Lockers as the Type and Save.

5. Within the existing storage locations, find the one you just created and click Configure.

6. Add locations for each locker making sure they have Locker in the name and Save.
