How to Check if Existing Storage Barcodes Will Work with SMRT

Josh Nye

2 years ago · Updated

[Follow](#)

New customers frequently have existing barcodes on their storage conveyors and other locations. To check if they will work follow the instructions below.

You will need a barcode scanning app for this, I recommend the Scandit Barcode Scanner app.

1. Get a picture of each set of locations from the customer.
2. Scan the barcode with your phone.

[Help](#)

3. If the barcode does not contain more than 2 letters, it will not work.

Barcode examples that will work: FOLD, HOUSEHOLD, SR100, ROUTE1

Barcode examples that won't work: 100, 0100, 2000A, 10-A
