Follow

SMRT partners with many third party services to provide our users with the best possible experience and support. We've listed the services that the SMRT Client App will make outbound connections to. Connections to below hosts are made exclusively using HTTPS on port 443. You can add below hostnames in a web filter/web content blocker whitelist to ensure SMRT is able to operate fully.

Service Name	Hostname(s)	Usage
SMRT App	*.smrtapp.com , *.smrtsystems.com	Core functionallity
Algolia	*.algolia.net , *.algolianet.com	Universal search function
Elev.io	*.elev.io , player.vimeo.com	App sidebar
Amazon AWS	*.amazonaws.com	Core functionallity

Help

Keep in mind that this list may change as we continue improving SMRT

Hi! I'm traveling and don't have the SMRT app saved to the laptop that I'm using. Can someone send me a link so I can access our KPI's and customer info?

Thank you so much!

Warm regards,

Janet Garman
