Stripe Terminal Setup
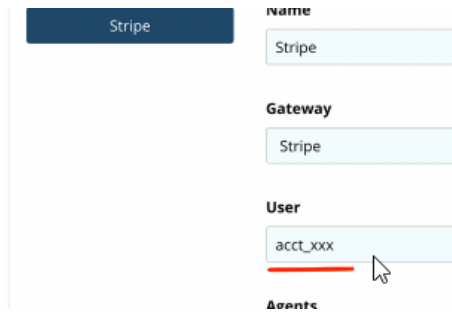

Pre Setup in SMRT:

1. Make sure that the Store has an address and that it is valid.
2. Go To Payment Settings

Add **Stripe Terminal** to **Accepted Payment Methods**

Create a Stripe merchant and set User to the business' Stripe account **(acct_xxx)**. This step is also applicable for online payments with Stripe.
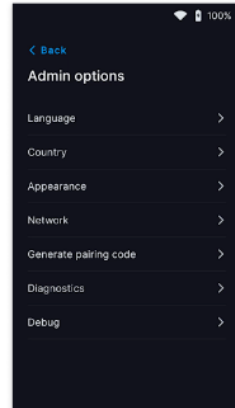

Connecting Stripe to SMRT

To open the settings menu, **swipe right from the left edge of the reader screen to reveal a Settings button**. Tap the **Settings** button and enter the admin **PIN 07139**. From here, you can **update your WiFi settings** or **generate a pairing code** for device registration. Battery status is displayed at the top right of this screen. To close the settings menu, click the back arrow in the top left corner.

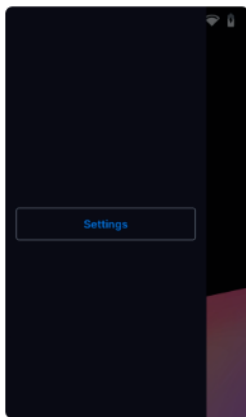

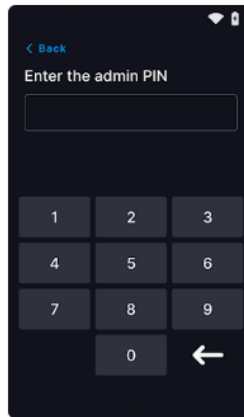

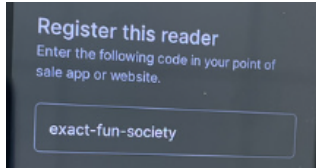

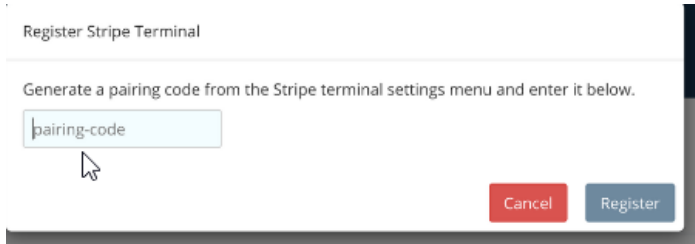

Settings button   Admin PIN screen   Settings menu

Select **Generate Pairing Code i**n the menu and note the pairing code which you will put into SMRT. Example:

You will then enter this code into your SMRT Station by going to Settings>Hardware>Stripe Terminal Setup.

Enter the code your Stripe Provided you in Generate Pairing Code.

If you get an error message in SMRT after clicking Register: "Failed to register reader with error" Please ensure that the store address is correct.

If Registered successfully, your Stripe will go back to its main screen, and your SMRT Station will see the Stripe associated with your Station as shown below:
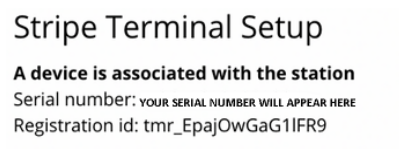

The final switch to begin using your new Stripe terminals will require one final step, which must be performed after hours. Please contact SMRT Support to request that your Stripe merchant be activated after hours, on the date you request.
